ROCKDOOR

Rock Solid Everytime

ROCKDOOR

Rock Solid Everytime

Welcome to Rockdoor.

Established in 1996 Rockdoor has been instrumental in the development of composite doors, leading the way in style, innovation and security. To this date, we have produced almost half a million doors from our high-tech manufacturing facility in Lancashire.

Rockdoors are tailor-made from scratch for the ultimate in strength, with each door being manufactured to your exact requirements here in the UK.

Our vast collection of composite doors are thoughtfully designed to suit many different tastes and property styles. The range features many individual door styles, from the contemporary to the traditional, and includes the market leading Rockdoor Stable door and French doors.

ROCKDOOR

Make Your Home Rock Solid

ROCKDOOR

Rock Solid Strength & Security

The founding principles of Rockdoor were to create a composite door that was a 'cut above the rest', both in terms of style and security.

Almost two decades on, Rockdoor is now so well renowned for the strength and security of our door that even the Fire Service & Police have to practice gaining access to it in the unlikely event of an emergency.

Rockdoor hit the front pages back in 2004 with the headline 'Door that Beat the Bobbies'. Local Police had to abandon their attempts of breaking into a Rockdoor - even with battering rams - as the strength and security of a Rockdoor stopped them in their tracks.

This accolade surpasses any accreditation in the industry by some distance, and is testament to the security that only a Rockdoor can afford.

To see for yourself why a Rockdoor is so secure, please see pg 6 & 7.

Secured by Design

Rockdoor is manufactured in accordance with Secured by Design, an accreditation fully backed by the police. All Secured by Design products are tested in accordance with strict guidelines to reduce crime. To ensure your door meets these requirements, simply specify your Rockdoor to be Secured by Design.

A Cut Above the Rest

What better way to demonstrate the strength and security of a Rockdoor, than the above picture showing the Fire Service trying to gain entry through the door whilst on a training exercise. The service recently visited our manufacturing facility to practice getting into a Rockdoor, in the rare event of having to force entry in an emergency. To help them in their training, they used a high tech diamond tipped power saw – something even expert burglars don't carry with them.

THE ULTIMATE Rockdoor

■ Secure

Rockdoors are designed to be as secure as possible. Multipoint locks, steel drill plates, cylinder protectors, outer & inner frame reinforcing and anti-bumping cylinders provide complete peace of mind.

■ Strong

Rockdoor is made with a unique engineered door system 'made to measure' for strength, not 'cut to fit' which weakens the door. It is designed with a bespoke reinforced inner & outer frame, specially designed to hold all the components including locks, deadbolts & hinges.

■ Thermally Efficient

Rockdoor is the most thermally efficient door available with an entire Series available with an A-Rating for thermal performance. Press glazed technology, sash thickness, PU foam, PVC-U skins and thermally efficient soft coat glass are used to achieve an A-Rating.

■ Durable

Rockdoors are manufactured from high impact PVC-U to match windows. All coloured/wood doors are protected by Heat Shield technology meaning your door won't crack, bend or warp.

■ Style

Whatever your preference, Rockdoor has the UK's widest range of door styles, glass designs, colours and furniture options.

■ Low Maintenance

PVC-U is low maintenance and only requires an occasional wipe down with warm soapy water. As a Rockdoor contains no wood, it's impervious to water meaning it won't swell.

Multipoint Hook Locks

German engineered hook locks exclusive to Rockdoor. Made from steel and brass for ultimate strength & security.

Argon Glass Unit

Toughened glass units filled with Argon Gas to provide the most thermally efficient door available.

Carbon Fibre

An industry first, Rockdoors Carbon Fibre reinforced inner-frame makes it the strongest door frame on the market.

Cylinder

Secured by Design Cylinder; anti-bump and anti-pick manufactured to British Standards 1303.

Cylinder Guard

Zinc cylinder guard protector to stop lock barrels from being snapped.

Steel Drill Plates

Concealed & reinforced steel drill plates prevent locks from being drilled out by thieves.

Engineered Frame

The door skeleton is welded together and is impervious to moisture ensuring it won't swell or rot.

An Inner Strength

The illustration on the opposite page provides an interesting insight into what goes on under the surface of a Rockdoor. Our innovation and engineering expertise in composite door development, backed by our attention to detail will go a long way to ensuring you and your family's security.

Steel Keeps

Brass hook locks engage into full length steel keeps to prevent forced entry.

Rebar

Outerframe features a reinforced thermal block for strength and thermal efficiency.

Hinge Block

Provides the strongest fixing points available when installing the door.

Door Outerframe

Multichambered, insulated outerframe for high levels of thermal performance.

Factory Glazing

No cassettes giving greater resistance to glass removal, perfect colour match and no air or water leakage.

Door Surface

Thick & tough 3mm skins both internally and externally resist cutting and impact.

3D Hinges

Engineered 3 way adjustable hinges secured into the Carbon Fibre frame for extra strength.

Letterplate

Opens to 180° for convenient and safe day to day use, and comes with integral brush strip for thermal efficiency.

Steel Mesh

A unique and **optional** welded steel mesh security system can increase the strength of your Rockdoor by 4 times.

ULTIMATE

Series

You care about style, you care about looks, and you obviously care about security. That's why Rockdoor Ultimate is the popular choice for those with discerning tastes and security concerns. Our top-of-the-range door, Rockdoor Ultimate looks superb on any property. Ultra-high security German engineered locks and a Carbon Fibre reinforced frame, makes it the **strongest composite door available**.

Ultimate comes in a choice of 27 door styles, many of which are exclusive to us. There are several intricate and exquisite glass designs as well as the finest handles and letterplates available.

In addition to security and looks, Ultimate series can also boast **Door Set Energy Ratings of A**. Please ask your installer for Rockdoors 'Guide to A-Ratings' leaflet before making your choice.

Please ask your installer for our leaflet called "Guide to A-Ratings".

Stable Doors

ULTIMATE

A Rockdoor Stable Door is quite simply the best Stable Door on the market - greatly admired and respected in the industry, and is one of our most popular styles. It offers all the performance benefits you would expect of a Rockdoor, together with the functionality that only a Stable Door can provide.

The option to open the top door only, ensures that children and pets are kept safe and secure while still allowing fresh air into your home. It offers you the benefits of a window where only a door will fit!

New Feature

We recommend choosing a colour matched drip bar with all Stable Doors.

Obscure/Backing Glass

Choosing an obscure backing glass in replacement of clear glass will reduce the Door Energy Ratings - we recommend all designs featuring Gluechip glass are backed using clear glass to enable us to use Soft Coat glass. Alternatively if you would like a different backing glass, the following options are available.

Gluechip
(Gluechip bespoke random pattern, extra cost option)

Honeycomb

Glacier

Woodland

Misted
(extra cost option)

Sandstone

Threshold

Choose a threshold to suit your lifestyle. Our most common threshold is option 1 as this is suitable for wheelchair and pram access.

1. Low Aluminium
Threshold

(Document L compliant & Suitable for Tie-Bar)
Low Aluminium Thresholds may reduce your doors energy rating.

2. Slim PVC-U
Threshold

3. Full PVC-U
Threshold

ELITE

Series

Security and safety are obviously paramount, but you want a competitively priced door that looks great too. **Rockdoor Elite Series** is exactly that.

Featuring secure multipoint hook locks, the Elite Series offers a wide choice of stylish door and glass designs as well as quality handles and letterplates. The Elite Series can play a big part in keeping your home and family safe and warm.

Elite Series features **Door Energy Ratings of C** (which is still far above industry standards). To achieve this, we use warm edge spacerbars and energy efficient hard coat glass. To ensure your door is C-Rated choose a clear backing glass.

Please note: Glass designs in the Elite Series are photographed on a Sandstone backing glass for illustrative purposes. Please choose Sandstone backing glass if you require extra privacy.

Features & Benefits

- Energy Rating - C if Chosen With Clear Backing Glass
- Security Rating - 3 as Standard
- 44mm Thick Door Sash
- 2mm High Impact Door Skins
- Aluminium Reinforced Frame
- Hard Coat Backing Glass
- Argon Filled Double Glazed Unit
- Warm Edge Spacerbar
- Secure Multipoint Locking System
- Engineered 3D Adjustable Hinges
- High Quality Furniture
- CE Marked as Standard

Letterplate

Urn Knocker

Additional Glass Designs

We are pleased to offer the following glass options to help you match certain property types or existing window patterns.

Georgian Bar

Only available in Windsor, Jacobean, Kentucky. Available in White, Light Oak & Woodgrain.

9mm Diamond Lead

9mm Square Lead

Surrounding Glass

If you are choosing glass for sideframes, fan lights or arches we recommend choosing Sandstone as this best suits our range of glass designs in the Select Series.

Furniture Colours

Furniture Options (Cont'd)

Urn Knocker
with spy hole

Numerals

Clear Lite

Clear Lite glass designs are available in Crystal which is mounted on Sandstone Backing Glass therefore not requiring an additional backing glass. Crystal provides a translucent effect to the glass. As the designs are individually crafted, they may contain air inclusions and could appear slightly non-uniform which is considered an authentic attribute of the unique liquid pattern.

Clear Lite

Obscure/Backing Glass

All glass designs in the Select series have been photographed using a Sandstone backing glass for privacy. If you would like a different obscure/backing glass, the following options are available.

Gluechip
(Gluechip bespoke random pattern, extra cost option)

Honeycomb

Glacier

Sandstone

Woodland

Misted
(extra cost option)

Threshold

Choose a threshold to suit your lifestyle. Our most common threshold is option 1 as this is suitable for wheelchair and pram access.

1. Low Aluminium
Threshold

(Document L compliant)
(Suitable for Tie-Bar)

2. Slim PVC-U
Threshold

3. Full PVC-U
Threshold

Heat Shield

Doors are prone to high levels of heat absorption which can often cause problems. Rockdoor however has the solution called Heat Shield technology which is standard on all Woodgrain & Coloured Rockdoors. Heat Shield reflects all of the NIR rays of the sun helping to keep the doors surfaces cool.

iPhone & iPad

Rockdoor At Your Fingertips

Here's a great way to browse at your leisure the superb Rockdoor range. Download the new Rockdoor App now and you can choose the design, glass and colour that most appeals to you, using the latest technology available.

Rockdoor's App is completely free and provides the perfect way to visualise how a Rockdoor will look on your home. Using Augmented Reality Technology, Rockdoor has created an App that lets you photograph your existing door; then choose from a selection of images to help you choose the perfect Rockdoor that best compliments your home.

You can then scale the image as required on screen, so it gives you an accurate impression of how a new Rockdoor would look on your property.

The Rockdoor App enables you to do the following:

- Take a picture of your existing door through the camera on your iPhone or iPad.
- You can then choose from a huge range of door styles, colours and glass designs to help you choose a Rockdoor which best suits your property.
- Once you have chosen your Rockdoor; the picture can be viewed over the top of your existing door picture using Augmented Reality Technology.
